Become an engineering mentee!

Are you an underclassman in engineering? Find a mentor to help you learn all you need to know about engineering at UT!

Don’t have a lot of time? Don’t worry! EMP only requires you meet with your mentor for an hour each month, although we do have many fun, optional events available throughout the year!

A great way to meet people in your field! The Engineering Mentor Program pairs upperclassmen engineering students with an underclassman in their field of study with similar interests.

To sign up, visit utkemp.squarespace.com and fill out an application. Email emp@utk.edu with any questions.
